-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 27 March 2007.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

Art Unit: 3662

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Lines 2-4 of independent claim 1 are indefinite and unclear in that the language is self-contradictory. First, the passage states that "both antenna arrangements" have "exciters" (transmitters?); but, the remainder of lines 2-4 seem to state that the first antenna arrangement is for transmitting, and the second antenna arrangement is for receiving. How can the second antenna arrangement be for receiving if it is also attached to an exciter (i.e., transmitter)?

Throughout claims 1-10, each and every use of the terms "exciter" and "patch exciter" are indefinite and unclear in context. Normally, an exciter would be understood to be a transmitter. Please see 37 CFR §1.75(d)(1).

Lines 4-12 of claim 1 are indefinite and unclear in that the language is functional without stating clearly and definitely the structure that achieves the recited function. Please note that the passage starts on line 4 of claim 1 with the words, "the two antenna arrangements have antenna characteristics in which ...".

Dependent claims 2-10 are unclear in that they depend from unclear independent claim 1.

Art Unit: 3662

3. The Specification is hereby objected to under 37 CFR §1.71 as failing to teach one of ordinary skill-in-the-art adequately how to make and to use the invention.

Lines 4-12 of independent claim 1 are functional descriptions of the invention starting with the words, "the two antenna arrangements have antenna characteristics in which ...". Similarly, in dependent claim 3, the language is functional using similar phrasing ("... antenna characteristics ... are such that ..."). And, further, dependent claim 4 is functional in language with the words, "... having a different antenna characteristic ... to detect ...". The Specification fails to teach one of ordinary skill-in-the-art how to make and to use the claimed apparatus that performs these recited functions.

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Please see the remarks with the objection to the Specification in section 3 above.
